FARMACIJA NA VELIKOM PLATNU – GDJE NAUKA SUSREĆE DRAMU

Jeste li ikada razmišljali kako lijekovi i farmacija oblikuju ne samo naš svakodnevni život, već i svijet filma?

Od uzbudljivih trilera do emotivnih drama, farmacija često igra ključnu ulogu u pričama koje nas drže prikovanima za ekran.

Farmaceutska industrija igra ključnu ulogu u zdravstvu, od otkrivanja lijekova do zagovaranja javnog zdravstva. Bilo kroz napete drame, inspirativne dokumentarce ili uzbudljive biografske filmove, filmovi i TV serije uhvatili su inovacije, izazove i etičke dileme ovog područja.

Brojni filmovi nas podsjećaju da farmacija nije samo o pilulama i receptima — ona je duboko isprepletena s etikom, nadom i borbom za život.

**Zanima te kako izgleda svijet farmacije iza kulisa?
Možda je vrijeme da ga pogledaš i očima nauke — i filma.**

Ako ste zainteresovani za farmaceutiku, biotehnologiju ili medicinska istraživanja, na izložbi otkrijte koji filmovi i serije pružaju fascinantn uvid u svijet farmaceutskih priča.

EXHIBITION

STROSMAJEROVA 3/I

PHARMACY ON THE BIG SCREEN – WHERE SCIENCE MEETS DRAMA

Have you ever wondered how drugs, medicines and pharma shape not only our daily lives, but also the world of movies?

From thrilling thrillers to emotional dramas, pharma often plays a key role in the stories that keep us glued to the screen.

The pharmaceutical industry plays a key role in healthcare, from drug discovery to public health advocacy. Whether through suspenseful dramas, inspiring documentaries or exciting biopics, films and TV series have captured the innovations, challenges and ethical dilemmas of the field.

Numerous films remind us that pharma is not just about pills and prescriptions — it is deeply intertwined with ethics, hope and the fight for life.

Are you curious about what the world of pharma looks like behind the scenes?

Maybe it's time to look at it through the eyes of science — and film.

If you are interested in pharmaceuticals, biotechnology or medical research, discover which films and series provide fascinating insights into the world of pharmaceutical stories at the exhibition.
